- Special purpose reports (review, agreed-upon procedures, prospectus)
- Special audits or investigations with assurance experts
- Knowledge of familiarity with the best practices of local GAAPs
- IFRS conversion
- Internal control system/internal control optimisation
- Assessment, optimisation and enhancement of IT systems support
- Data extraction and analysis
- Benchmarking of accounting, finance and risk management, functions of worldwide subsidiaries

Our approach

PwC is excellently placed to offer a comprehensive range of services to the commodity trading community.

We base our work on in-depth market analysis, as well as a detailed understanding of the best practices of commodity trading organisations, the financial risk management function and internal control design.

Our leadership position is based on hands-on experience with some of the leading trading companies across the spectrum of Energy (Oil, Gas, Power), Agriculture, Metals as well as Shipping and Freight.

**We know your business.
Together we can add
value to your commodity
trading.**
