- Project lead for the HR process and organisational design of a global logistics company

Personal questions

What do you like about your job?

No engagement is ever the same as another. The challenge of always having to adapt to the clients and working with so many different and interesting people on projects remains fascinating even after many years.

What are the most important factors for success as an employee today?

Be open for new challenges and go for them when they appear. Be flexible and find a team you enjoy working with; the rest will come.

What personal goal do you still have?

I have always admired people who participate in the Ironman on Hawaii. Since I can't find the time to train enough anymore, participating may qualify more as a dream than as a realistic goal.

Qualifications

Masters degree in economic engineering (Wirtschaftsingenieur), Technical University of Hamburg
