

ESG key considerations

and how we support

January 2022

www.pwc.ch/sustainability

If you ever wondered,

we can help you find the answers

Is my ESG strategy embedded in my corporate strategy and in line with my sustainability commitments and industry best practice?

- ESG strategy and governance
- Accelerator workshop / gap and readiness assessment
- Benchmarking

We critically review your ESG strategy and operationalisation measures related to all impacted functions to detect gaps and highlight risks and opportunities to best achieve your sustainability goals.

How do I increase returns with sustainable investing and financing solutions?

- Sales channel and process optimisation
- Product adjustment and development
- ESG-optimised client journeys
- Revenue and margin
- Tax optimisation and supply chain

We support you in optimising ESG product and service offerings and go-to-market strategies in order to increase returns and at the same time to be compliant and mitigate risks on greenwashing.

How do I engage my employees to act in line with my ESG strategy?

- Social responsibility
- Equal salary / executive compensation
- Diversity and inclusion
- Employee education

We support you in addressing the key components of sustainable diversity and inclusion management: equal pay and equal opportunities, D&I strategy, awareness and education, D&I analytics and building an inspiring D&I culture.

How can I best quantify, integrate and manage ESG risks?

- ESG risk quantification and modelling
- ESG risk integration and management

We support you in assessing, quantifying and modelling ESG risks and help you in integrating them into your risk framework to fulfil regulatory standards expected from the market.

How can I optimise our ESG reporting?

- ESG report generation and assurance
- ESG data selection and integration
- Transparency (tax, supply chain, etc.)

We support you in reporting scope definition, efficient data access and automation to ensure you comply and communicate with impact on all reporting obligations and reach benchmark levels on stakeholder communication.
