Implementation of Tax Reform and AHV Financing (TRAF) in the canton of Schaffhausen

The cantonal government of Schaffhausen announced the cantonal draft bill to implement the national proposal of the tax law named “Federal Act on Tax Reform and AHV Financing” (TRAF). With this draft, the attractive tax environment will be further strengthened and, at the same time, international acceptance will be ensured.

Accordingly, the cantonal tax law will implement the future modifications of the Tax Harmonisation Act (StHG), resulting in the abolition of special tax status companies at cantonal level (privileged taxation as a holding company, mixed company or domiciliary company). This will occur simultaneously with the introduction of internationally recognised replacement measures.

The popular vote at federal level will take place on 19 May 2019.

The fact that Schaffhausen has already announced the revised cantonal draft tax law underlines the fact that corporate taxpayers, in particular companies that currently qualify for a special cantonal tax status, are important to the Canton of Schaffhausen.

All companies domiciled in the canton will benefit from the reduction of the profit and capital tax rates, whereas companies that so far did not benefit from any special tax status may expect a substantial reduction of their tax burden.

The following page provides an overview of the most important legislative changes with their effects on corporate taxation in Schaffhausen.

Overview of the most important planned legislative changes with their effects on corporate taxation in Schaffhausen

**Maximum relief limitation**
The cantons are obliged to introduce a limitation for the relief from all TP17 measures combined. In order to remain competitive, the Canton of Schaffhausen sets the respective limitation at 70 % for the first five years. After that, the limitation will be set at 50 %. In other words, a quota of only 30 % resp. 50 % of the taxable income will remain ordinarily taxed.

**Patent box**
The proportion of income from patents and similar rights to the extent it is based on qualifying research and development expenses (R&D), is included in the calculation of taxable net income with a relief of 90 %. Upon entry into patent box, previous R&D expenses are credited against patent box profits for a limited period of 5 years avoiding a up-front tax cash out and resulting in a deferred phase-in into the box benefits.

**Transitional rules/Step-up**
The realisation of hidden reserves and self-generated goodwill of companies which were taxed under a privileged regime before will be taxed separately at a rate of ~1.63 % for a limited period of 5 years. For a classical step-up a ruling with the Schaffhausen tax authorities is required.

**Reduction of corporate income tax rate**
As of 1 January 2020, a reduction from currently 15.7 % to 14.2 % is planned. As of 1 January 2025, an additional decrease to 12.3 % shall become effective. The planned decrease in 2025 occurs simultaneously with a reduction of the maximum relief limitation.

**Partial taxation of dividend income**
If individuals hold participations of more than 10 %, the tax rate on dividends is currently reduced by 50 %. This system will be replaced by a partial taxation, i.e. qualifying dividends will be considered only 60 % for the assessment of the tax base.

**Reduction of capital tax base**
All companies tax their equity capital at the rate of 0.051 ‰, which corresponds to the capital tax rate of the former status companies.

**R&D super deduction**
Upon request by the taxpayer as from 1 January 2025, an additional deduction of 25 % may be granted on qualifying Swiss sourced R&D expenses.

1) Calculated for City of Schaffhausen, with multiplier 2019.
