Since the global financial crisis, regulatory reform has changed the insurance and reinsurance industry dramatically (e.g. EU Sustainable Finance Action Plan, amendment of IDD, revision of VVG, Solvency II, IFRS 17, etc.). Knowing the legal landscape means staying on the road to success.

Amidst digital transformation and shifts in consumer behaviour, there is an inherent risk of missing critical topics or taking required actions too late.

In today’s rapidly evolving marketplace environment, key business issues are converging with impacts felt across multiple industry sectors. It is crucial to be on top of all regulatory developments in the financial markets.

Our solution: forward thinking and best-in-class technology
