

Environment

Our commitment:

To address our impact on the environment, in 2018 we globally committed to drive efficiencies to reduce our absolute carbon impact, offset 100% of air travel emissions, source 100% renewables for our electricity consumption, and offset residual energy use by 2022. In 2020 we are raising our climate ambition, by making a worldwide science-based commitment to reach net zero greenhouse gas emissions by 2030, building on our existing global environment commitment.
