# PwC's Legal Regulatory Radar goes for Sustainable Finance

## Sustainable finance – regulatory challenges

Legislators around the world are adopting comprehensive sustainable finance strategies and corresponding legislation (e.g. the EU Action Plan Sustainable Finance, Taxonomy, Sustainable Finance Disclosure Regulation (SFDR), Green Deal, Renewed Sustainable Finance Strategy, etc.). Given the green regulatory tsunami, there's an inherent risk of missing out on critical topics or taking required actions too late. Knowing the regulatory landscape gives you a strategic advantage for the benefit of the environment, society and economy alike.

## Our digital solution to be fully informed

Based on PwC's global network, the Regulatory Radar is our response to the regulatory avalanche, allowing users to keep track of the latest sustainability-related trends worldwide. By combining technology and PwC's practical experience and knowledge, the Radar can highlight a way forward in order to be 'sustainability-compliant'.

### Forward thinking and best-in-class technology

- AI-based online platform with ever-evolving scope and technological features
- Highest degree of customisation and flexibility (geographic scope, regulatory authorities, regulatory updates and impact assessments)
- Additional support services such as helpline or gap analyses

### Your benefits:

#### Early warning system

Regular and frequent regulatory updates (incl. forward-looking tool, regulatory repository per country)

#### Digital access

Easy Web-based tool in time of digitalisation

#### Increase business success

Increasing business success through early identification and regulatory analysis

#### Forward-looking tool

Yearly regulatory outlook brochure

#### Ad-hoc support

Ad-hoc support for relevant regulatory topics

#### Consolidated supervision

Consolidated supervision of regulatory initiatives

#### Clear prioritisation

Clear prioritisation of regulatory updates

#### Regulatory updates

Structured summary of updates per regulation and easy to extend country-by-country and regulation-by-regulation

#### Impact analysis

Quarterly high-level impact assessment for selected regulations

#### Tasks and responsibilities

Assigning tasks and responsibilities
