# Cloud services

## Regulatory and Technology Expertise

### Our competence

“Ensuring compliance in cloud computing and enabling your business with it at once” is the strength of our RegTech cloud services. The use of cloud solutions has turned from a potential option into a must-have across various industries to empower organisations and stay relevant in today’s fast-paced, data-driven world. To offer you optimal support in the areas of technology, security, privacy, legal and compliance, and to build trust in your individual cloud solution, we have put together a team of regulatory and technology specialists to provide the best holistic cloud services on the market.

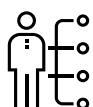

### Our RegTech cloud services cover:

cloud education modules in technology, privacy, security, legal and compliance

industry-specific, individually tailored advice on any cloud topic from interdisciplinary, seasoned PwC professionals, and

support with cloud strategies, technology providers and RegTech solutions.

### Your benefits

of ensuring compliance of cloud computing and enabling your business with it are provided by our RegTech cloud services team:

- composed of cloud experts in technology, security, privacy, legal and compliance
- at the forefront of regulatory and technology developments in cloud topics in Switzerland and internationally (e.g. via regulatory working groups, technology innovation centres and conferences, industry and PwC global networks), and
- highly connected and experienced to work with leading cloud technology providers in Switzerland and internationally, especially in highly regulated industries like banking and insurance
